

Errata to
Coalescing Particles on an Interval

J. Theoret. Probab. **12** (1999), 201–205.

by MICHAEL LARSEN AND RUSSELL LYONS

On page 202, Theorem 1 should begin “With this notation”. On page 204, line 10 should read “ k moves in total. Note: we consider two pairs of particles after time k , regardless of which ones have coalesced. For example, even if $k = 0$ and”.
