

Erratum to

Asymptotic Enumeration of Spanning Trees

Combin. Probab. Comput. **14** (2005), 491–522.

by RUSSELL LYONS

In Remark 4 on p. 502, the denominators $\pi(y)$ should both be $\pi(x)$. For the question concerning the display after (3.14) on p. 509, the graph should be assumed connected.

There are some mathematical errors as well: Theorem 4.1 is incorrect and the proofs of Theorem 4.2, Proposition 4.3, and Theorem 4.4 are incomplete. This is all corrected (and extended) in the preprint *Identities and Inequalities for Tree Entropy*.
