

Errata to

**Conceptual Proofs of $L \log L$ Criteria
for Mean Behavior of Branching Processes**

Ann. Probab. **23** (1995), 1125–1138.

by RUSSELL LYONS, ROBIN PEMANTLE, AND YUVAL PERES

The proof of Theorem C(ii) in case $\sigma = \infty$ is incorrect. There is a similar gap in the book by Athreya and Ney (1972). We do not have a general proof for this case.
